MARNING – USER RESPONSIBILITY

FAILURE OR IMPROPER SELECTION OR IMPROPER USE OF THE PRODUCTS DESCRIBED HEREIN OR RELATED ITEMS CAN CAUSE DEATH, PERSONAL INJURY AND PROPERTY DAMAGE.

This document and other information from Parker-Hannifin Corporation, its subsidiaries and authorized distributors provide product or system options for further investigation by users having technical expertise.

The user, through its own analysis and testing, is solely responsible for making the final selection of the system and components and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application, follow applicable industry standards, and follow the information concerning the product in the current product catalog and in any other materials provided from Parker or its subsidiaries or authorized distributors.

To the extent that Parker or its subsidiaries or authorized distributors provide component or system options based upon data or specifications provided by the user, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the components or systems.

Offer of Sale

The items described in this document are hereby offered for sale by Parker-Hannifin Corporation, its subsidiaries or its authorized distributors. This offer and its acceptance are governed by the provisions stated in the detailed "Offer of Sale" elsewhere in this document or available at www.parker.com/ipdus.

Introduction

C

Parker C Series Check Valves are designed for uni-directional flow control of fluids and gases in industries such as chemical processing, oil and gas production and transmission, pharmaceutical, pulp and paper, power and utilities.

Features

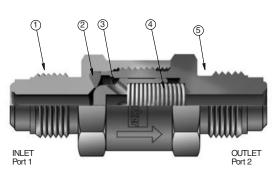

- Resilient, custom molded, blow-out resistant seat design
- Back stopped poppet minimizes spring stress
- ▶ 100% factory tested for both crack and reseat
- Cracking pressures include: 1/3, 1, 5, 10, 25, 50, 75, and 100 psi.
- ▶ Port connections include male and female NPT, CPI™, A-LOK[®], UltraSeal, VacuSeal, BSP, SAE and Seal-Lok[®]
- ► Heat code traceability

Specifications

Pressure Rating:**

316 SS – 1/8" to 3/4":	6000 psig (414 bar) CWP
1":	5000 psig (345 bar) CWP
PTFE Seats, all sizes:	
Brass – 1/8" to 1":	3000 psig (207 bar) CWP
Temperature Rating:	
Temperature Rating: Fluorocarbon Rubber15°F to	9 +400°F (-26°C to +204°C)

Neoprene Rubber45°F to +250°F (-43°C to +121°C)
PTFE65°F to +400°F (-54°C to +204°C)
Highly Fluorinated Fluorocarbon Rubber
15°F to +200°F (-26°C to +93°C)
Orifice:078" to .656" (2.0 mm to 16.7 mm)

Model Shown: 4V-C4L-5-SS

Materials of Construction

Part Description	Stainless Steel	Brass

Seat*	Fluorocarbon F	Rubber*
Donnat	ASTM A 479,	ASTM B 16,
Popper	Type 316	Alloy C36000
Spring	316 Stainless	s Steel
Padu	ASTM A 276,	ASTM B 16,
bouy	Type 316	Alloy C36000
	Cap Seat* Poppet	CapASTM A 276, Type 316Seat*Fluorocarbon FPoppetASTM A 479, Type 316Spring316 StainlessBodyASTM A 276,

Optional seat materials are available. See How to Order section. Lubrication: Perfluorinated Polyether.

Note: PTFE seated valves employ an additional PTFE coated 316 SS gasket between the seat and the body and are distinguishable from elastomeric seated valves by the gap designed between the body and cap.

**See Pressure Rating note on page 4.

50	3.45	40	2.76	60	4.14	5 BCP	0.34 BCP	
75	5.17	60	4.14	90	6.21	7 BCP	0.48 BCP	
100	6.89	80	5.52	120	8.27	10 BCP	0.69 BCP	

BCP means "Below Cracking Pressure."

Cracking pressure is defined as the upstream pressure at which a detectable flow is measured.

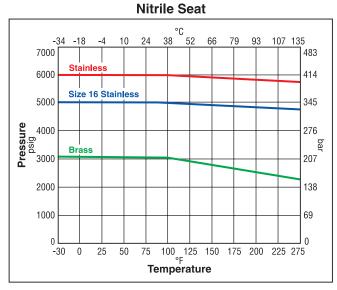

Re-seal pressure is defined as the downstream pressure at which the check valve closes bubble-tight.

Example: For a valve with a spring having a rated cracking pressure of 25 psig (1.72 bar), the actual cracking pressure ranges between 20 and 30 psig (1.38 and 2.07 bar). The re-seal pressure range would be 16 to 20 psig (1.10 to 1.38 bar). Check valves having springs with rated crack pressures of 3 psig (0.21 bar) or less may require up to 4 psig (0.28 bar) back pressure to re-seal bubble-tight.

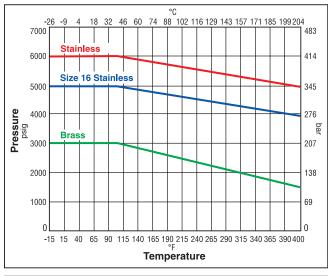

Note: Check valves which are not actuated for a period of time may initially crack at higher than the above crack pressure ranges.

PTFE seated valves require a minimum back pressure of 100 psig (6.9 bar) to insure a leak-tight re-seal.

Pressure vs. Temperature

Pressure Rating and Tubing Selection: For working pressures of A-LOK® and CPITM tube connections, please see the Instrument Tubing Selection Guide (Bulletin 4200-TS), found in the Technical Section of the Parker Instrumentation Process Control Binder, or the Parker Instrument Tube Fitting Installation Manual (Bulletin 4200-B4).

For working pressures of valves with external or internal pipe threads, please see Catalog 4260, Instrumentation Pipe Fittings.

* Tested in accordance with ISA S75.02. Gas flow will be choked when $P_1 - P_2 / P_1 = x_T$.

† For CPI[™] and A-LOK[®], dimensions are measured with nuts in the finger tight position.

Pressure Rating and Tubing Selection: For working pressures of A-LOK[®] and CPI[™] tube connections, please see the Instrument Tubing Selection Guide (Bulletin 4200-TS), found in the Technical Section of the Parker Instrumentation Process Control Binder, or the Parker Instrument Tube Fitting Installation Manual (Bulletin 4200-B4).

For working pressures of valves with external or internal pipe threads, please see Catalog 4260, Instrumentation Pipe Fittings.

* Tested in accordance with ISA S75.02. Gas flow will be choked when $P_1 - P_2 / P_1 = x_T$.

+ For CPI[™] and A-LOK[®], dimensions are measured with nuts in the finger tight position.

How to Order

C

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

Example 1 below describes a C Series Check Valve with 3/4" CPI[™] compression inlet and outlet ports, a 5 psi cracking pressure, nitrile seal and brass body construction.

Example 2 below describes a C Series Check Valve with a 1" male NPT inlet port and a 1" A-LOK[®] outlet port, a 10 psi cracking pressure, neoprene seal and stainless steel body construction.

Example 1: 12Z-C12L-5-BN-B (shown in the part number blocks below)

Example 2: 16M16A-C16L-10-NE-SS

Options

Oxygen Cleaning – Add the suffix -C3 to the end of the part number to receive filters cleaned and assembled for oxygen service in accordance with Parker specification ES8003. **Example:** 4A-C4L-1-BN-SS-C3 Laser Weld – Add the suffix -LW to the end of the part number to receive tamper-resistant stainless steel filters. Example: 2F-C2L-1-SS-LW

C Series Check Valves

C

Kit Information

To order repair kits for the C Series Check Valves simply fill in the designators from the chart below.

	Crack		
Size	Pressure		Seat Material
C2	1/3 psi	V	Fluorocarbon Rubber
C4	1 psi	BN	Nitrile
C6	5 psi	EPR	Ethylene Propylene
C8	10 psi		Rubber
C12	25 psi	NE	Neoprene Rubber
-	50 psi	*T	PTFE
C16	75 psi	KΖ	Highly Fluorinated
	100 psi		Fluorocarbon

*PTFE kits can only be used to replace factory installed PTFE seats. It cannot be interchanged with seats of any other material.

Examples: KIT-C8-10-V, KIT-C16-100-BN

Check Valve Kits Contain: Seat Spring Instructions

Rugged and reliable floating ball valve seat design

optimizes sealing characteristics while minimizing

Optional hard PTFE coated ball cage resists poppet

"stick" commonly experienced with fuel oil coking.

▶ Fully field serviceable with Parker rebuild kits. Re-

place seats in minutes without special tools. Advanced reinforced PTFE copolymer seat materials designed by Parker for demanding applications

Integral "last chance" filter option for seat and

▶ To even further reduce turbine downtime during repairs, utilize Parker's metal flexible hoses.

Features

effects of coking.

nozzle protection.

suited for higher temperature applications requiring high integrity leak rates and re-sealing capabilities. Specifications

Parker CB and CBF Series Check Valves are designed for uni-directional flow control of fluids and gases. The unique floating ball valve design handles demanding services in power generation, chemical processing, oil/ gas production, and other demanding applications. The CB/CBF Series are specifically designed to reduce

check valve maintenance and performance requirements on dual fuel turbines. Specific issues include, but are

not limited to seat leakage, coking, repair and maintenance. All of these issues directly affect turbine efficiency, impacting operating costs. The advanced seat materials of the CB/CBF Series Check Valves are particularly

How to Order CBF Series Check, Filter Valves

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The seven product characteristics required are coded as shown in the chart.

The example below describes a CBF Series Check, Filter Valve with a 1/2" CPI[™] compression inlet and a 1/2" male NPT outlet, a 1 psi crack pressure, Parkerfill seat material, stainless steel body construction and a 380 Micron filter rating.

Example: 8Z8M-CBF8L-1-PF-SS-380

8Z	8M -	CBF8L	- 1	- PF	- SS	- 380
Inlet	Outlet	Body	Crack	Seat	Body	Filter

*If the inlet and outlet ports are the same, eliminate the outlet port designator.

Repair Kits — CBF Series Check, Filter Valves

Seal kits (KITS) include seat, body gasket and crack spring. Valve kits (KITV) include seat, body gaskets, crack spring and ball. Optional parts for valve kits include ball cage and filter. To order, fill in the designators from the chart below.

Kit	Size	Crack Pressure	Seat Material		Seat Material Valve Kit Options		Filter Rating
KITS	CBF8	1 psi	PF	Parkerfill	Blank	None	75 Microns
KITV		5 psi	PC	Parker	1	Ball Cage	200 Microns
		10 psi		Carbon	2	Filter	380 Microns
		25 psi			3	Ball Cage &	500 Microns
		50 psi				Filter	(Include with filter
		75 psi					option)
		100 psi					
		120 psi					

Examples:

. Seal kit part number: **KITS-CBF8-10-PF** Valve kit part number: **KITV-CBF8-10-3-200** (with Ball Cage and 200 micron filter option)

Introduction

Parker CO Series Check Valves are designed for uni-directional flow control of fluids and gases in industries such as chemical processing, oil and gas production and transmission, pharmaceutical, pulp and paper, power and utilities. The CO Series Check Valve is particularly suitable for applications requiring high integrity leak rates and re-sealing capabilities.

Features

CO

- Seal integrity across the seat and to atmosphere is tested to 4 x 10⁻⁹ std atm-cc/sec (4 x 10⁻¹⁰ kPa – L/sec) for the CO4L with fluorocarbon rubber seals. All other sizes and seal materials are tested to 1 x 10⁻⁵ std atm-cc/sec (1 x 10⁻⁶ kPa – L/sec).
- Special seat seal design provides a repeatable high integrity seal and accurate cracking pressures
- 100% factory tested. Cracking pressures include: 1/3, 1, 5, 10, 25, 50, 75, and 100 psi.
- Valves are available with male and female NPT, CPI™, A-LOK[®], UltraSeal, male and female VacuSeal, and Tube Adapter
- Heat code traceability
- Color coded identification labels indicate seal material

CO

Crack and Re-Seal Performance

	Valve k Pressure		Acceptable ressure		Acceptable ressure		n Re-seal ressure
psig	bar	psig	bar	psig	bar	psig	bar
1/3	0.02	0	0.00	1	0.07	4	0.28
1	0.07	0	0.00	3	0.21	4	0.28
5	0.34	3	0.21	8	0.55	3 BCP	0.21 BCP
10	0.69	7	0.48	13	0.90	3 BCP	0.21 BCP
25	1.72	20	1.38	30	2.07	4 BCP	0.28 BCP
50	3.45	40	2.76	60	4.14	5 BCP	0.34 BCP
75	5.17	60	4.14	90	6.21	7 BCP	0.48 BCP
100	6.89	80	5.52	120	8.27	10 BCP	0.69 BCP

BCP means "Below Cracking Pressure."

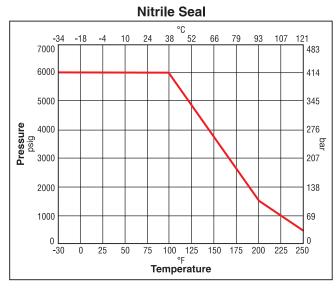

Cracking pressure is defined as the upstream pressure at which a detectable flow is measured.

Re-seal pressure is defined as the downstream pressure at which the check valve closes bubble-tight.

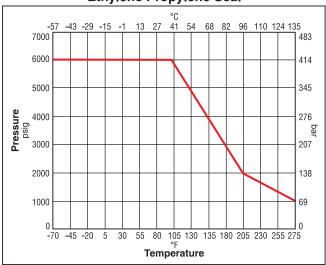

Example: For a valve with a spring having a rated cracking pressure of 25 psig (1.72 bar), the actual cracking pressure ranges between 20 and 30 psig (1.38 and 2.07 bar). The re-seal pressure range would be 16 to 20 psig (1.10 to 1.38 bar). Check valves having springs with rated crack pressures of 3 psig (0.21 bar) or less may require up to 4 psig (0.28 bar) back pressure to re-seal bubble-tight.

Note: Check valves which are not actuated for a period of time may initially crack at higher than the above crack pressure ranges.

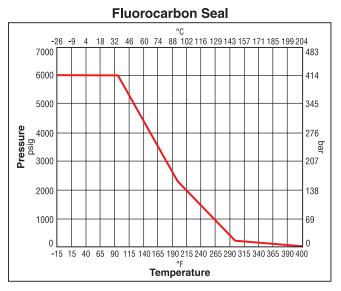

Pressure vs. Temperature

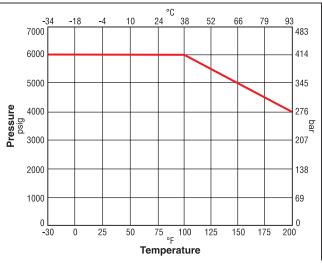

Ethylene Propylene Seal

Note: To determine MPa, multiply bar by 0.1

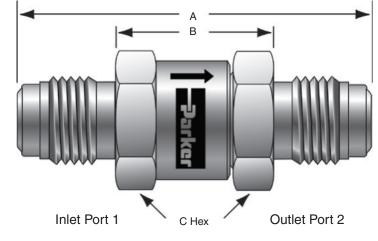

Highly Fluorinated Fluorocarbon Seal

How to Order

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

The example below describes a CO Series Check Valve with 1/4" male NPT inlet and a 1/4" female NPT outlet, 1 psig cracking pressure, fluorocarbon rubber seals, and stainless steel body construction.

	[4M Inlet Port*			4F Out Por	let t*	-	CO4L Body Size	- 1 Cra Press	- I	- V Seat/Seal Material	-	SS Body Material

8M	8V			8M	8V						Rubber		

Example: 4M4F-CO4L-1-V-SS

*If the inlet and outlet port s are the same, eliminate the outlet port designator.

Options

Oxygen Cleaning – Add the suffix -C3 to the end of the part number to receive filters cleaned and assembled for oxygen service in accordance with Parker specification ES8003. **Example:** 4A-CO4L-1-BN-SS-C3 **Special Cleaning** – All face seal ended valves are cleaned in accordance with Parker Specification ES8001. This is an option for all valves by adding the suffix -C1 to the end of the part number. **Example:** M6A-CO4L-10-SS-C1 **Material** – Contact the factory for availability of AOD/VAR stainless steel and ID Electropolish.

Introduction

Parker's LC-Series Lift Check Valve has been designed for a wide variety of temperature extremes found in power, chemical, petrochemical, oil & gas, and laboratory applications. The LC-Series, ideal for liquid service, has been designed to prevent flow in the reverse direction to within 99.9% of forward flow. The gravity assisted poppet uses back pressure to achieve a seal.

Features

LC

- ► Wide temperature range
- Variety of end connections available
- Compact design
- ▶ Rugged, forged body construction
- Stainless steel construction

MPC MPCB

Introduction

Parker F Series Inline Filters are designed for protection of instrumentation systems from undesirable materials. Component changes or repair and maintenance can admit dirt, chips, scale, or other contaminants to the small bore tubing.

Features

- Compact inline design with large filtration area
- Stainless steel and brass construction
- Replaceable sintered 316 stainless steel filter element
- Standard sintered metal micron ratings: 1, 5, 10, 50, and 100
- Optional 250 and 450 micron wire cloth filter elements
- ▶ Port connections include male and female NPT, CPI™, A-LOK[®], UltraSeal, VacuSeal, BSP, SAE, and Seal-Lok[®]
- ► Heat code traceability

Specifications

Pressure Rating:

316 SS

F

1/8" to 3/4"	.6000 psig (414 bar) CWP
1"	.5000 psig (345 bar) CWP
All sizes with PTFE Seals	.4000 psig (276 bar) CWP
Brass - 1/8" to 1"	.3000 psig (207 bar) CWP

Temperature Rating:

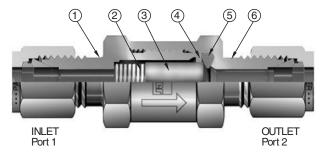

Fluorocarbon Rubber...-15°F to +400°F (-26°C to +204°C) Nitrile Rubber.....-30°F to +275°F (-34°C to +135°C) Ethylene Propylene Rubber

-70°F to +275°F (-57°C to +135°C) Neoprene Rubber......-45°F to +250°F (-43°C to +121°C) PTFE-65°F to +400°F (-54°C to +204°C)

Highly Fluorinated Fluorocarbon Rubber

.....-15°F to +200°F (-26°C to +93°C)

Materials of Construction

Model shown: 4A-F4L-50-SS

Note: Flow direction reversed with wire mesh elements.

Materials of Construction

Item #	Part	Stainless Steel Part Filter					
1	Body	Body ASTM A276, Type 316					
2	Spring	Spring 316 Stainless Steel					
3	Filter Element	316 Stain	less Steel				
4	Guide Ring	PT	FE				
5	Seal*	Fluorocarbo	on Rubber*				
6	Сар	Cap ASTM A276, AS Type 316 Allo					

* Optional seal materials are available. See How to Order section. Lubrication: Perfluorinated Polyether.

Note: Optional wire cloth filter elements may slightly alter dimensions A and B on filters with combination end connections.									41.3	1.500	38.1

Note: Optional wire cloth filter elements may slightly alter dimensions A and B on filters with combination end connections. †For CPITM and A-Lok[®]: Dimensions are measured with nuts in the finger tight position.

F

How to Order

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

Example 1 below describes an F Series Inline Filter with 1/4" male NPT inlet and outlet ports, a 5 micron element, Nitrile seal and brass body construction.

Example 2 below describes an F Series Inline Filter with a 1" male NPT inlet port and a 1" A-LOK[®] outlet port, a 10 micron element, neoprene seal and stainless steel body construction.

Example 1: 4M-F4L-5-BN-B (shown in the part number blocks below)

Example 2: 16M16A-F16L-10-NE-SS

*If the inlet and outlet ports are the same, eliminate the outlet port designator.

Options

Oxygen Cleaning – Add the suffix -C3 to the end of the part number to receive filters cleaned and assembled for oxygen service in accordance with Parker specification ES8003. **Example:** 4A-F4L-10-V-SS-C3 **Laser Weld** – Add the suffix -LW to the end of the part number to receive tamper-resistant stainless steel filters. **Example:** 2M-F2L-5-SS-LW

Kit Information

F

To order repair kits for the F Series Inline Filters simply fill in the designators from the chart below.

Size	Micron Rating		Seat Material
F2	1 micron	V	Fluorocarbon Rubber
F4	5 micron	BN	Nitrile Rubber
F6	10 micron	EPR	Ethylene Propylene
F8	50 micron		Rubber
F12	100 micron	NE	Neoprene Rubber
	250 micron	Т	PTFE
F16	450 micron	KZ	Highly Fluorinated
			Fluorocarbon

Examples: KIT-F8-10-V, KIT-F16-100-BN

Filter Kits Contain: Molded Seal, Filter Element, Guide Ring, Spring and Maintenance Instructions

Caution: When interchanging sintered metal elements with wire cloth filter elements, the flow direction is reversed.

_

F

Introduction

Parker FT Series Tee Filters are designed for protection of instrumentation systems from undesirable materials. Component changes or repair and maintenance can admit dirt, chips, or other contaminants to the small bore tubing.

Features

- Filter element replacement achievable without removing filter from installation
- Compact, high strength forged body design with effective filtration areas of:
 - FT4 1.57 sq in (1013 sq mm) FT8 – 2.53 sq in (1632 sq mm)
- Stainless steel and brass construction
- Standard sintered metal micron ratings: 1, 5, 10, 50, and 100
- Optional 250 and 450 micron wire cloth filter elements
- Optional bypass enables a continuous self cleaning flow around the element
- ► Port connections include male and female NPT, CPI™, A-LOK[®], UltraSeal, and VacuSeal

Specifications

• Pressure Ratings:

With Elastomeric and Metallic Seals:

Pressure Rating and Tubing Selection:

For working pressures of A-LOK[®] and CPI[™] tube connections, please see the Instrument Tubing Selection Guide (Bulletin 4200-TS), found in the Technical Section of the Parker Instrumentation Process Control Binder, or the Parker Instrument Tube Fitting Installation Manual (Bulletin 4200-B4).

For working pressures of valves with external or internal pipe threads, please see Catalog 4260, Instrumentation Pipe Fittings.

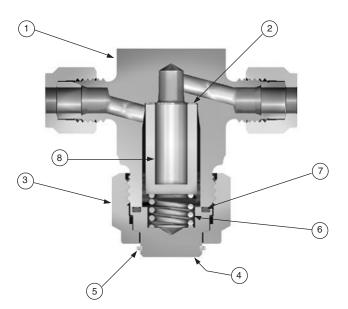

Definitions

Filter Element – The component within the filter which captures media contamination.

Filtration Area – The surface area of the filter element available to capture contamination.

Micron – A unit of measure used to indicate the mean pore diameter of the filter element or the mean particle diameter of media contamination.

One micron = 0.00004 inch or 0.0010 mm

Model Shown: 4Z-FT4-10-BN-SS

Materials of Construction

Item #	Part	Stainless Steel Filter	Brass Filter				
1	Body	ASTM A182, Type F316	ASTM B283, Alloy C37700				
2	Washer	316 Stain	less Steel				
3	Nut	Nut ASTM A479, Type 316					
4	Сар	ASTM A479, Type 316	ASTM B16, Alloy C36000				
5	Retainer Ring	PH 15-7 Mo S	Stainless Steel				
6	Spring	316 Stainless Steel					
7	Seal	Fluorocarbon Rubber					
8	Element	316 Stain	less Steel				

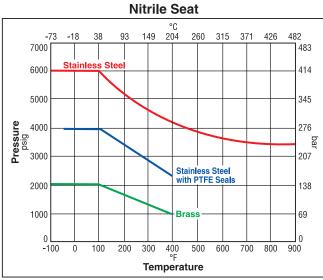

* Optional seal materials are available. See How to Order section. Lubrication: Perfluorinated Polyether.

Installation

Best installation practice is to orient the cap downward. This helps to prevent contaminants from entering the system during element change.

Pressure vs. Temperature

Note: This Pressure versus Temperature chart reflects the maximum temperature range of indicated body materials.

The temperature rating of the seal becomes the limiting factor on temperature range.

Temperature Ratings:

Nitrile Rubber40°F to 275°F (-40°C to 135°C)
Highly Fluorinated Fluorocarbon Rubber
Ethylene Propylene Rubber
70°F to 300°F (-57°C to 149°C)
Fluorocarbon Rubber40°F to 400°F (-40°C to 204°C)
Neoprene Rubber
Silver Plated Nickel Alloy Gasket (C-ring)
100°F to 900°F (-73°C to 482°C)
PTFE70°F to 400°F (-56°C to 204°C)

Note: To determine MPa, multiply bar by 0.1

FT

How to Order

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The six product characteristics required are coded as shown in the chart.

The example below describes an FT Series Filter with 1/4" male NPT inlet and outlet ports, a 5 micron element, Nitrile seal and brass body construction.

Ex	Example: 4M-FT4-5-BN-B														
			4M			-	·	FT4	-	5] -	BN	-		В

*If the inlet and outlet ports are the same, eliminate the outlet port designator.

Options

Oxygen Cleaning – Add the suffix **-C3** to the end of the part number to receive filters cleaned and assembled for oxygen service in accordance with Parker specification ES8003. **Example:** 4A-FT4-10-V-SS**-C3**

Bypass – Add the suffix–**PB** to the end of the part number to receive a 1/8" –27 FNPT tapped Cap for sampling. **Example:** 2M-FT4-5-V-SS-**PB**

Integral Compression Ported Bypass Option – Add the suffix **-PBA** (A-LOK[®]) or **-PBZ** (CPI[™]) to the end of the part number to receive a 4Z/4A (FT4) or 6A/6Z (FT8) compression ported Cap. **Example:** 2M-FT4-5-V-SS-**PBZ**

Kit Information

To order repair kits for the FT Series Filters, simply fill in the designators from the chart below.

	Micron						
Size	Rating		Seal Material				
FT4	1 micron	V	Fluorocarbon Rubber				
FT8	5 micron	BN	BN Nitrile Rubber				
	10 micron	EPR Ethylene Propylene Rubber					
	50 micron	NE Neoprene Rubber					
	100 micron	KZ Highly Fluorinated Fluorocarbon					
	250 micron	HT	Silver PLated Nickel Alloy C-Ring				
	450 micron						

Examples: KIT-FT4-10-V, KIT-FT8-100-BN

Filter Kits Contain: Seals, Filter Element, Spring and Maintenance Instructions.

Caution: When interchanging sintered metal elements with wire cloth filter elements, the flow direction is reversed.

MPF Series Filters

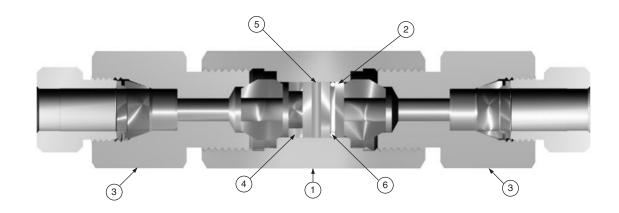

Parker MPF series filters utilize sintered stainless steel filter discs to trap particles from 0.5 to 100 micron sizes. Inline filters help protect valuable equipment in the process line.

Inline Filters

	Parker	Pressure		Orifice	Length	Thickness		Filter N	/licron (Size Av	ailable

MPF

Introduction

Parker RH4 Relief Valves are designed such that when the upstream pressure exceeds the closing force exerted by the spring, the lower stem opens, permitting flow through the valve. Flow through the valve increases proportionately to the increase in upstream pressure.

Features

- Pressure settings are externally adjustable while the valve is in operation. Eight different spring ranges provide greater system sensitivity and enhanced performance.
- Captured molded seat design is blow-out and chip resistant.
- Manual Override option with positive stem retraction is available for pressures up to 1500 psig (103 bar). This option permits the user to relieve upstream pressure while maintaining the predetermined cracking pressure.
- Color coded springs and labels indicate spring cracking range.
- ► Lock wire feature secures a given pressure setting.

Specifications

Working Pressure:

Up to 6000 psig (414 bar) CWP.

Up to 8000 psig (552 bar) during relief with no internal seal damage.

Cracking Pressure:

Eight springs, from 50 psig to 6000 psig in the following ranges:

50-350 psig	350-750 psig
(3.4-24.1 bar)	(24.1-51.7 bar)
1500-2250 psig	2250-3000 psig
(103.4-155.1 bar)	(155.1-206.8 bar)
4000-5000 psig	5000-6000 psig
(275.8-344.7 bar)	(344.7-413.7 bar)

750-1500 psig (51.7-103.4 bar) 3000-4000 psig (206.8-275.8 bar)

Temperature Rating:

Nitrile Rubber.....-30°F to +225°F (-34°C to +107°C) Highly Fluorinated Fluorocarbon Rubber

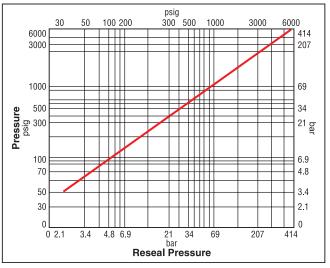

.....-20°F to +200°F (-29°C to +93°C) Ethylene Propylene Rubber

-70°F to +275°F (-57°C to +135°C) Fluorocarbon Rubber ..-10°F to +400°F (-23°C to +204°C) Neoprene Rubber-45°F to +250°F (-43°C to +121°C)

RH4

How to Order

Dimensions in inches (millimeters) are for reference only, subject to change.

The correct part number is easily derived from the following example and ordering chart. The eight product characteristics required are coded as shown in the chart.

Example 1 below describes an RH4A Series externally adjustable relief valve equipped with 1/4" CPI™ compression inlet and outlet ports, Nitrile seals, PTFE back-up ring, stainless steel construction, and a 3000 to 4000 psig (206.8 to 275.8 bar) spring kit.

Example 2 below describes an RH4A Series externally adjustable relief valve equipped with 1/4" male NPT inlet port, 1/4" female NPT outlet port, ethylene propylene seals, PTFE back-up ring, stainless steel construction, manual override option, and a 50 to 350 psig (3.4 to 24.1 bar) spring kit.

Example 1: 4Z-RH4A-BNT-SS-K6 (shown in the part number blocks below)

Example 2: 4M4F-RH4A-EPRT-SS-MN-K1

Stem Cartridge Seat Maintenance Instructions

Introduction

Parker RL4 Relief Valves are designed such that when the upstream pressure exceeds the closing force exerted by the spring, the lower stem opens, permitting flow through the valve. Flow through the valve increases proportionately to the increase in upstream pressure.

Features

- Pressure settings are externally adjustable while the valve is in operation. Seven different spring ranges provide greater system sensitivity and enhanced performance.
- Manual override option with positive stem retraction is available for the full working pressures range. This option permits the user to relieve upstream pressure while maintaining the predetermined cracking pressure.
- Color coded springs and labels indicate spring cracking range.
- Back pressure has minimum effect on cracking pressure.
- Lock wire feature secures a given pressure setting.

Specifications

Working pressure:

Up to 400 psig (28 bar) CWP

Up to 600 psig (41 bar) during relief with no internal seal damage.

25-50 psig

(1.7-3.4 bar)

150-225 psig

(10.3-15.5 bar)

Cracking pressure:

Seven springs with the following ranges:

10-25 psig (0.7-1.7 bar)	
100-150 psig (6.9-10.3 bar)	
10-225 psig (0.7-15.5 bar)	

50-100 psig (3.4-6.9 bar) 225-400 psig (15.5-27.6 bar)

Temperature Rating:

Nitrile Rubber.....-30°F to 225°F (-34°C to 107°C) Highly Fluorinated Fluorocarbon Rubber

.....-20°F to 200°F (-29°C to 93°C) Ethylene Propylene Bubber

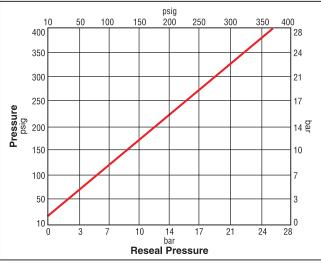

Fluorocarbon Rubber10°F to 400°F (-23°C to 204°C)
Neoprene Rubber45°F to 250°F (-43°C to 121°C)

Introduction

Parker BV Series Bleed Valves are designed for use on products such as multi-valve manifolds or gauge/root valves. Functionally, the valve vents line pressure either to atmosphere or to containment when used with the optional barbed vent tube. Generally, bleed valves are used whenever an instrument is removed from a system or to assist in the calibration of control devices. The BV Series is also recommended for use in bleeding hydraulic systems.

Features

- Available in stainless steel, carbon steel and Alloy N24135
- Vent tube directs excess gas or liquid from system lines
- Chrome plated stem provides extended cycle life with improved sealability
- Positive stop/vent tube design prevents accidental removal of the stem
- Compact design
- Wrench actuation
- Available in a variety of end configurations including male pipe and SAE ports
- ▶ 100% factory tested
- Barbed vent tube option enables containment of vented media
- Optional T-bar handle for wrench-less actuation

Specifications

Pressure Rating:

.....10,000 psig (689 bar) CWP

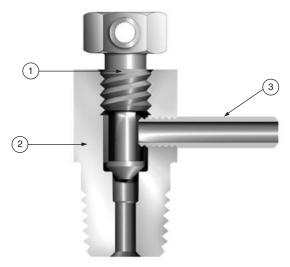

BV

Temperature Rating:

Flow Data

 $C_v = 0.13$; $x_T = 0.53$; Orifice = 0.125" (3.2mm). Tested in accordance with ISA S75.02. Gas flow will be choked when $P_1 - P_2 / P_1 = x_T$.

Materials of Construction

Model Shown: 4M-BV4-SS

Item #	Part	Stainless Steel	Carbon Steel	Alloy 400
1	Stem	ASTM A479	ASTM B164	
2	Valve Body	ASTM A479, ASTM A108, Type 316 Grade 12L14		ASTM B164
3	Vent Tube	316 Stain	ASTM B164	

Lubrication: Molybdenum disulfide with soft metallic fillers

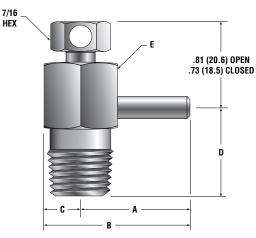

Caution

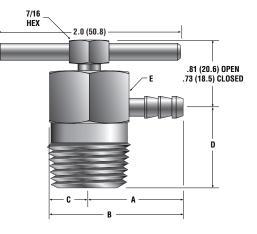

These valves do not have a stem seal. It is imperative to open the valve slowly and direct the vent tube away from persons operating or near the valve. Because of the absence of a stem seal, small amounts of media will flow through the stem thread area when the valves are opened.

Introduction

Parker PG Series Purge Valves may be utilized as either bleed, purge, or drain valves. The compact valve requires only a quarter turn with a wrench from finger-tight to ensure a leak-tight seal on the first make-up. Additional wrenching ensures a leak-tight seal up to the rated pressure.

Features

- A 0.055 inch (1.4 mm) diameter vent hole in the cap bleeds, drains, or purges system pressure
- Hex cap permits finger-tight or wrench assisted closure
- Crimped cap resists accidental disassembly
- A variety of body styles offers system design flexibility, reduced space requirements, and helps to eliminate leak paths
- ► Available in a variety of end configurations including: CPI™, A-LOK[®], male and female NPT, SAE, and Tube Adapter connections
- ▶ 100% factory tested
- Optional PTFE Ball requires only finger-tight torque to achieve a leak-tight seal

Specifications

Temperature Rating:

Stainless Steel	65°F to 600°F (-54°C to 316°C)
Brass	65°F to 400°F (-54°C to 204°C)
Carbon Steel	20°F to 350°F (-29°C to 177°C)
PTFE Ball Option	65°F to 350°F (-54°C to 177°C)

Pressure Rating:

Stainless Steel	4000 psig (276 bar) CWP
Brass	3000 psig (207 bar)
Carbon Steel	3000 psig (207 bar)
PTFE Ball Option	200 psig (14 bar)

Caution

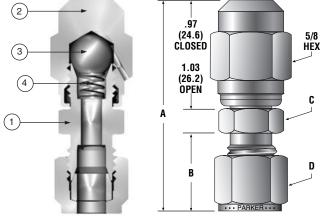

PG

These valves do not have a cap thread seal. It is imperative to open the valve slowly and direct the vent hole away from persons operating or near the valve. Because of the absence of a cap seal, small amounts of media will flow through the cap thread area when the valves are opened.

PTFE Ball Option

Purge Valves with the PTFE ball option require only finger-tight operation for leak-tight shut-off and are designed with a removable cap for ball replacement.

* For CPI[™] and A-LOK[®], dimensions are measured with nuts in the finger tight position.

How to Order

The correct part number is easily derived from the following example and ordering chart. The seven product characteristics required are coded as shown in the chart.

The example below describes a stainless steel, 90° angle body PG4 Purge Valve with a 1/8" male NPT port configuration and a PTFE Ball.

configuration and a FIFE ball.																
Example: 2M-PG4A-SS-T																
	2	2 M			P	G4	ŀ	4	-	[SS	-	-	T	
	1	End ection	*			lve ries	Bo Ty	•			Ма	terial			Ball	
	Co	End nnectio	on*	Valve Body Series Type		ſ	/laterial			Ball						
2A 2Z 2F 2M 2TA	4A 4Z 4F 4F5** 4M 4TA	6A 6F 6M 6TA 6Z	8A 8F 8F5* 8M 8TA 8Z	M67 M62 M87 M87	Z A	PG4	L A E TL TA U	45° E Tee	ght Elbow Elbow with Inline Fl with Angle F	low	SS B S	Stainle Steel Brass Carbor Steel		Blank T	Stainl Steel PTFE	
* If the ports are the same, only specify one end connection.																

** Male SAE port will be supplied with a fluorocarbon rubber O-ring by adding O after F5; 2M-PG4A-SS-T-C3 i.e., 4F5O. Dimensions in inches (millimeters) are for reference only, subject to change.

Option Oxygen Cleaning –

Add the suffix **-C3** to the end of the part number to receive valves cleaned for oxygen service per IVD Specification ES8003. **Example:** 2M-PG4A-SS-T**-C3** PG

End Conn

Available End Connections

Standard End Connections

A - Two ferrule A-LOK[®] compression port

Z - Single ferrule CPI™ compression port

F - ANSI/ASME B1.20.1 internal pipe threads

M - NSI/ASME B1.20.1 external pipe threads

Non-Standard End Connections

TA - Tube adapter connection

F5 - SAE J1926/2, Part 2: Heavy-duty (S Series) stud ends

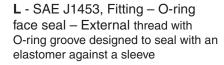

G5 - SAE J1926/1, Part 1: Threaded port with O-ring seal in truncated housing

KM - British Standard BS 21 (ISO 7-1), External pipe threads

End Conn

Q - UltraSeal face seal port

KF - British Standard BS 21

(ISO 7-1), Internal pipe threads

V - VacuSeal face seal port

Offer of Sale

The items described in this document and other documents and descriptions provided by Parker Hannifin Corporation, its subsidiaries and its authorized distributors ("Seller") are hereby offered for sale at prices to be established by Seller. This offer and its acceptance by any customer ("Buyer") shall be governed by all of the following Terms and Conditions. Buyer's order for any item described in its document, when communicated to Seller verbally, or in writing, shall constitute acceptance of this offer. All goods or work described will be referred to as "Products".

1. Terms and Conditions. Seller's willingness to offer Products, or accept an order for Products, to or from Buyer is expressly conditioned on Buyer's assent to these Terms and Conditions and to the terms and conditions found on-line at www.parker.com/saleterms/. Seller objects to any contrary or additional term or condition of Buyer's order or any other document issued by Buyer.

2. Price Adjustments; Payments. Prices stated on the reverse side or preceding pages of this document are valid for 30 days. After 30 days, Seller may change prices to reflect any increase in its costs resulting from state, federal or local legislation, price increases from its suppliers, or any change in the rate, charge, or classification of any carrier. The prices stated on the reverse or preceding pages of this document do not include any sales, use, or other taxes unless so stated specifically. Unless otherwise specified by Seller, all prices are F.O.B. Seller's facility, and payment is due 30 days from the date of invoice. After 30 days, Buyer shall pay interest on any unpaid invoices at the rate of 1.5% per month or the maximum allowable rate under applicable law.

3. Delivery Dates; Title and Risk; Shipment. All delivery dates are approximate and Seller shall not be responsible for any damages resulting from any delay. Regardless of the manner of shipment, title to any products and risk of loss or damage shall pass to Buyer upon tender to the carrier at Seller's facility (i.e., when it's on the truck, it's yours). Unless otherwise stated, Seller may exercise its judgment in choosing the carrier and means of delivery. No deferment of shipment at Buyers' request beyond the respective dates indicated will be made except on terms that will indemnify, defend and hold Seller harmless against all loss and additional expense. Buyer shall be responsible for any additional shipping charges incurred by Seller due to Buyer's changes in shipping, product specifications or in accordance with Section 13, herein.

4. Warranty. Seller warrants that the Products sold hereunder shall be free from defects in material or workmanship for a period of twelve months from the date of delivery to Buyer or 2,000 hours of normal use, whichever occurs first. This warranty is made only to Buyer and does not extend to anyone to whom Products are sold after purchased from Seller. The prices charged for Seller's products are based upon the exclusive limited warranty stated above, and upon the following disclaimer: DISCLAIMER OF WARRANTY: THIS WARRANTY COMPRISES THE SOLE AND ENTIRE WARRANTY PERTAINING TO PRODUCTS PROVIDED HEREUNDER. SELLER DISCLAIMS ALL OTHER WARRANTIES, EXPRESS AND IMPLIED, INCLUDING MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE.

5. Claims; Commencement of Actions. Buyer shall promptly inspect all Products upon delivery. No claims for shortages will be allowed unless reported to the Seller within 10 days of delivery. No other claims against Seller will

be allowed unless asserted in writing within 60 days after delivery or, in the case of an alleged breach of warranty, within 30 days after the date within the warranty period on which the defect is or should have been discovered by Buyer. Any action based upon breach of this agreement or upon any other claim arising out of this sale (other than an action by Seller for any amount due to Seller from Buyer) must be commenced within thirteen months from the date of tender of delivery by Seller or, for a cause of action based upon an alleged breach of warranty, within thirteen months from the date within the warranty period on which the defect is or should have been discovered by Buyer.

6. LIMITATION OF LIABILITY. UPON NOTIFICATION, SELLER WILL, AT ITS OPTION, REPAIR OR REPLACE A DEFECTIVE PRODUCT, OR REFUND THE PURCHASE PRICE. IN NO EVENT SHALL SELLER BE LIABLE TO BUYER FOR ANY SPECIAL, INDIRECT, INCIDENTAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF, OR AS THE RESULT OF, THE SALE, DELIVERY, NON-DELIVERY, SERVICING, USE OR LOSS OF USE OF THE PRODUCTS OR ANY PART THEREOF, OR FOR ANY CHARGES OR EXPENSES OF ANY NATURE INCURRED WITHOUT SELLER'S WRITTEN CONSENT, EVEN IF SELLER HAS BEEN NEGLIGENT, WHETHER IN CONTRACT, TORT OR OTHER LEGAL THEORY. IN NO EVENT SHALL SELLER'S LIABILITY UNDER ANY CLAIM MADE BY BUYER EXCEED THE PURCHASE PRICE OF THE PRODUCTS.

7. Contingencies. Seller shall not be liable for any default or delay in performance if caused by circumstances beyond the reasonable control of Seller.

8. User Responsibility. The user, through its own analysis and testing, is solely responsible for making the final selection of the system and Product and assuring that all performance, endurance, maintenance, safety and warning requirements of the application are met. The user must analyze all aspects of the application and follow applicable industry standards and Product information. If Seller provides Product or system options, the user is responsible for determining that such data and specifications are suitable and sufficient for all applications and reasonably foreseeable uses of the Products or systems.

9. Loss to Buyer's Property. Any designs, tools, patterns, materials, drawings, confidential information or equipment furnished by Buyer or any other items which become Buyer's property, may be considered obsolete and may be destroyed by Seller after two consecutive years have elapsed without Buyer placing an order for the items which are manufactured using such property. Seller shall not be responsible for any loss or damage to such property while it is in Seller's possession or control.

10. Special Tooling. A tooling charge may be imposed for any special tooling, including without limitation, dies, fixtures, molds and patterns, acquired to manufacture Products.

Offer of Sale

Such special tooling shall be and remain Seller's property notwithstanding payment of any charges by Buyer. In no event will Buyer acquire any interest in apparatus belonging to Seller which is utilized in the manufacture of the Products, even if such apparatus has been specially converted or adapted for such manufacture and notwithstanding any charges paid by Buyer. Unless otherwise agreed, Seller shall have the right to alter, discard or otherwise dispose of any special tooling or other property in its sole discretion at any time.

11. Buyer's Obligation; Rights of Seller. To secure payment of all sums due or otherwise, Seller shall retain a security interest in the goods delivered and this agreement shall be deemed a Security Agreement under the Uniform Commercial Code. Buyer authorizes Seller as its attorney to execute and file on Buyer's behalf all documents Seller deems necessary to perfect its security interest. Seller shall have a security interest in, and lien upon, any property of Buyer in Seller's possession as security for the payment of any amounts owed to Seller by Buyer.

12. Improper use and Indemnity. Buyer shall indemnify, defend, and hold Seller harmless from any claim, liability, damages, lawsuits, and costs (including attorney fees), whether for personal injury, property damage, patent, trademark or copyright infringement or any other claim, brought by or incurred by Buyer, Buyer's employees, or any other person, arising out of: (a) improper selection, improper application or other misuse of Products purchased by Buyer from Seller; (b) any act or omission, negligent or otherwise, of Buyer; (c) Seller's use of patterns, plans, drawings, or specifications furnished by Buyer to manufacture Product; or (d) Buyer's failure to comply with these terms and conditions. Seller shall not indemnify Buyer under any circumstance except as otherwise provided.

13. Cancellations and Changes. Orders shall not be subject to cancellation or change by Buyer for any reason, except with Seller's written consent and upon terms that will indemnify, defend and hold Seller harmless against all direct, incidental and consequential loss or damage. Seller may change product features, specifications, designs and availability with notice to Buyer.

14. Limitation on Assignment. Buyer may not assign its rights or obligations under this agreement without the prior written consent of Seller.

15. Entire Agreement. This agreement contains the entire agreement between the Buyer and Seller and constitutes the final, complete and exclusive expression of the terms of the agreement. All prior or contemporaneous written or oral agreements or negotiations with respect to the subject matter are herein merged.

16. Waiver and Severability. Failure to enforce any provision of this agreement will not waive that provision nor will any such failure prejudice Seller's right to enforce that provision in the future. Invalidation of any provision of this agreement by legislation or other rule of law shall not invalidate any other provision herein. The remaining provisions of this agreement will remain in full force and effect.

17. Termination. This agreement may be terminated by Seller for any reason and at any time by giving Buyer thirty (30) days written notice of termination. In addition, Seller may

by written notice immediately terminate this agreement for the following: (a) Buyer commits a breach of any provision of this agreement (b) the appointment of a trustee, receiver or custodian for all or any part of Buyer's property (c) the filing of a petition for relief in bankruptcy of the other Party on its own behalf, or by a third party (d) an assignment for the benefit of creditors, or (e) the dissolution or liquidation of the Buyer.

18. Governing Law. This agreement and the sale and delivery of all Products hereunder shall be deemed to have taken place in and shall be governed and construed in accordance with the laws of the State of Ohio, as applicable to contracts executed and wholly performed therein and without regard to conflicts of laws principles. Buyer irrevocably agrees and consents to the exclusive jurisdiction and venue of the courts of Cuyahoga County, Ohio with respect to any dispute, controversy or claim arising out of or relating to this agreement. Disputes between the parties shall not be settled by arbitration unless, after a dispute has arisen, both parties expressly agree in writing to arbitrate the dispute.

19. Indemnity for Infringement of Intellectual Property Rights. Seller shall have no liability for infringement of any patents, trademarks, copyrights, trade dress, trade secrets or similar rights except as provided in this Section. Seller will defend and indemnify Buyer against allegations of infringement of U.S. patents, U.S. trademarks, copyrights, trade dress and trade secrets ("Intellectual Property Rights"). Seller will defend at its expense and will pay the cost of any settlement or damages awarded in an action brought against Buyer based on an allegation that a Product sold pursuant to this Agreement infringes the Intellectual Property Rights of a third party. Seller's obligation to defend and indemnify Buyer is contingent on Buyer notifying Seller within ten (10) days after Buyer becomes aware of such allegations of infringement, and Seller having sole control over the defense of any allegations or actions including all negotiations for settlement or compromise. If a Product is subject to a claim that it infringes the Intellectual Property Rights of a third party, Seller may, at its sole expense and option, procure for Buyer the right to continue using the Product, replace or modify the Product so as to make it noninfringing, or offer to accept return of the Product and return the purchase price less a reasonable allowance for depreciation. Notwithstanding the foregoing, Seller shall have no liability for claims of infringement based on information provided by Buyer, or directed to Products delivered hereunder for which the designs are specified in whole or part by Buyer, or infringements resulting from the modification, combination or use in a system of any Product sold hereunder. The foregoing provisions of this Section shall constitute Seller's sole and exclusive liability and Buyer's sole and exclusive remedy for infringement of Intellectual Property Rights.

20. Taxes. Unless otherwise indicated, all prices and charges are exclusive of excise, sales, use, property, occupational or like taxes which may be imposed by any taxing authority upon the manufacture, sale or delivery of Products.

21. Equal Opportunity Clause. For the performance of government contracts and where dollar value of the Products exceed \$10,000, the equal employment opportunity clauses in Executive Order 11246, VEVRAA, and 41 C.F.R. §§ 60-1.4(a), 60-741.5(a), and 60-250.4, are hereby incorporated.

Parker's Motion & Control Technologies

At Parker, we're guided by a relentless drive to help our customers become more productive and achieve higher levels of profitability by engineering the best systems for their requirements. It means looking at customer applications from many angles to find new ways to create value. Whatever the motion and control technology need, Parker has the experience, breadth of product and global reach to consistently deliver. No company knows more about motion and control technology than Parker. For further info call 1-800-C-Parker.
